Subject: Implementation of an integrated Health & Safety, Environmental and Quality Management System and Certification

This letter is to confirm that SHER-Q Management Consultants cc. developed a Health & Safety, Environmental and Quality Management System for Tektower.

SHER-Q Management Consultants developed a Management System for Tektower in accordance with:

1. The standards and requirements of ISO system standards.
2. The standards and requirements of Eskom.
3. The ISO certification audit guidelines.

An internal system compliance audit was done on the 11th May, 2009 and an audit report highlighting the non-conformances was submitted to Tektower. The responsible Tektower employees and the SHER-Q Consultant are currently implementing corrective actions to rectify these non-conformances.

A follow-up internal system compliance audit will be done during August 2009 and a system certification audit will be scheduled soon after. The certification audit date should be available within the next five to seven working days and can be made available to interested parties upon request.

Interested parties can also, with prior arrangement, send auditors to Tektower to verify the above and to track progress.

Regards;

Bertus Dreyer
General Manager: SHER-Q Management Consultants cc.
